

ControlCase has certified Pine Labs' Plutus Secure Application

for the Industry Standard and Coveted PCI PA-DSS Certification

Pine Labs' Plutus Secure application has achieved the industry standard and coveted Payment Application Data Security Standard (PA-DSS) Certification through **ControlCase's PA-DSS Certification program**. Plutus Secure version 11.0.0, a credit/debit electronic data capture and authorization solution from Pine Labs, has been certified by ControlCase to be compliant with PA-DSS.

McLean, VA and Mumbai, India (PRWEB) August 18, 2009

Pine Labs' Plutus Secure application has achieved the industry standard and coveted Payment Application Data Security Standard (PA-DSS) Certification through **ControlCase's PA-DSS Certification program**.

Plutus Secure version 11.0.0, a credit/debit electronic data capture and authorization solution from Pine Labs, has been certified by **ControlCase** to be compliant with PA-DSS.

PA-DSS is a PCI (Payment Card Industry) Council managed program that can help software vendors develop secure payment applications and ensure their payment applications are compliant with Payment Card Industry Data Security Standards (PCI DSS).

ControlCase's qualified QPASA's (Qualified Payment Application Security Assessors) performed the PABP Assessment.

Plutus Secure is Windows™ based desktop Credit/Debit electronic data capture and authorization product and it is expected to be sold "off the shelf" to multiple customers. Plutus Secure Application consists of Plutus Secure and the Cisco VPN client used for establishing secure VPN connection with the Acquiring banks. This application is a platform that allows merchants to enable Point of Sale Electronic Data Capture (POS EDC) based acquisition of cards to accept payment from the customers. It can be configured with multiple acquirers to allow Merchant to have multiple payment processing options.

Plutus Secure supports all basic operations including online and offline transactions, batch settlement and reconciliation, and parameter based initialization. With the additional hardware add-ons, **Plutus Secure** can capture customer data from credit card needed for authorization and can print approval charge slips.
