

In your line of business, transaction speed and customer convenience are paramount.

We have designed a **cost-effective suite of services** to help you serve your customers better and improve your recharge operations.

Secure credit and debit processing at your PC Point of Sale - at substantially lower cost to transitional EDC terminals

- PC-based credit/debit processing on your PC
- “Always on” internet solution enables secure payment processing via public broadband - an affordable solution for even the smallest outlets, fully bank certified
- Online, real-time Transaction Reconciliation Management tool to monitor outlet performance, track operations and automate payment reconciliation and charge back management

Offer new services to your customers and generate new revenue through your POS

- Instant mobile recharges, utility bill payment and air/train/bus/movie tickets
- Voucherless electronic solution eliminates need for vouchers and coupons
- Electronic reconciliation and settlement eliminates cumbersome paperwork and transfers commission payments within 24 hours directly to your bank account

Engage your customers and expand your reach through innovative and cost-effective loyalty solutions

- Real-time, highly flexible rewards program and campaign management tools
- Branded closed-loop gift card and Corporate prepaid programs enhance your brand and support institutional sales
- Cost-effective ASP model to minimize upfront investment
